SUBJECT: **ANNUAL PER CAPITA CONSUMPTION OF FOOD IN CANADA, 1985, 1986***

This release summarizes the relative importance of selected foods in the consumptive patterns of Canadian consumers. The data are derived from the net food supply statistics. Net food supply is the difference between gross food supply (production plus imports plus initial stocks) and food exports plus ending stocks. Net food supply, adjusted for requirements for manufacturing inputs, seed, livestock feed and wastage, constitutes the amount of food available for human consumption.

Per capita consumption estimates do not indicate the amount of food actually consumed, but instead show what food is available for consumption, on the average, by individuals at July 1. Data for 1986 are preliminary and subject to revisions. The population numbers used are 25,380,000 for 1985 and 25,354,000 for 1986.

The factors used to convert from imperial to metric unit is:

1 pound = 1 ÷ 2.204 623 kg

1 gallon = 1 ÷ 0.219 974

FOOTNOTES

R Revised.
X Confidential to meet secrecy requirement of the Statistics Act.
.. Figures not available.
... Figures not appropriate or not applicable.
* Totals may not add due to rounding/conversions; 1984 values are preliminary and subject to revision.

1 Based on a cold dressed carcass weight and includes "bone in", "fat weight" and amounts used in canned goods and pet foods.

2 Does not include canned meats.

3 Chicken and fowl production includes Newfoundland and based on eviscerated weight.

4 Based on fresh equivalent and excludes imports of hatching eggs.

5 Based on retail weight.

5[a] Includes values for pot and pearl barley, corn flour and meal, buckwheat flour which are not individually given in order to meet the requirements of secrecy of the Statistics Act.

6 Includes cottage cheese, skim milk cheese and whey cheese.

7 Part of this product is used for animal feed.

8 Includes formula milk, whole milk powder of less than 26% fat, evaporated milk of 2% fat, concentrated liquid milk and whole milk powder.

9 Includes lactose, special formula skim milk products, concentrated liquid skim milk and condensed skim milk, powdered whey.

10 Litres / gallon.

11 Sales data used.

12 Wild rice produced in Canada is available as of 1981.

13 Excludes infant cereals.

14 Refined sugar imports and exports do not include sugar content of processed food commodities.

15 Includes all maple products expressed as maple sugar.

16 Excludes other sugar and reflects only the sum of data shown and not necessarily the total of the food group since confidential and unavailable data are not included.

17 Based on fresh equivalent: tea is in tea leaf equivalent; coffee and cocoa are in green bean equivalent.

18 Includes fresh, canned, juice, frozen, dried, sauce, pie filling.

18[a] Includes asparagus, brussel sprouts, parsnips, pumpkin and squash and unspecified.

19 Includes imported ketchup, fresh, canned, juice, pulp, paste, puree and greenhouse tomatoes.

19[a] Includes raspberries, cranberries, blueberries and apricots.

20 Oranges, lemons, grapefruits - fresh, juice.

21 Fresh.

22 Fresh, juice.

23 Fresh, includes cantaloupes and muskmelons and melons.

24 Canned.

25 Frozen.

26 Excludes dry beans and baked canned beans.

27 Excludes P.E.I.

28 Since 1982 includes production of greenhouse cucumbers.

29 Processed potato imports and exports converted to fresh equivalent.

30 Waste data also includes potatoes used for feed.

31 Excludes herring and all fish used for bait.

32 Excludes freshwater fish.
